WATER RIGHTS
SALT LAKE

07 May 1990

Robert L. Morgan, P.E.
State Engineer
1636 West North Temple Suite 220
Salt Lake City, Utah 84116-3156

Dear Mr. Morgan:

In checking the diversions of water on the Santa Clara River Drainage we observe that the Grass Valley-Pinto Diversion is being used to divert water to Pinto in violation of the Santa Clara River Decree.

Our attempts to have the violation stopped have not been effective and as a result we are loosing valueable water to users outside our area of use.

Please immediately instruct the Commissioner on the Santa Clara River to take any appropriate action to turn the water, presently being diverted to Pinto, down the Santa Clara River until such time as our primary water rights and other rights prior to the Pinto area water rights have been satisfied.

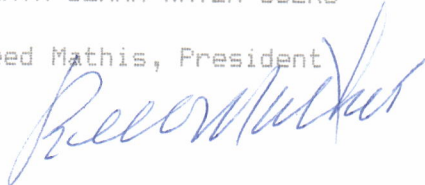

We believe that now is an appropriate time to resolve this problem.

An immediate reply to this request will be greatly appreciated.

Respectfully,

SANTA CLARA WATER USERS

Reed Mathis, President
